

POS

When considering the management of your business

Would it be helpful

To be able to make your decisions based on a single, current set of figures?

When considering managing your inventory

Would it be helpful

To be able to locate any item directly and immediately anywhere in the business – with any staff member?

When considering customer service

Would it be helpful

To be able to offer accurate advice on any aspect of the relationship and take effective action immediately?

Management 2000 supports stand alone POS and fully online Web POS

It is clear that the Web is the path of the future. It is clear that a Web enabled POS will be the norm in 10 years time. Even the banks accepted that a Web POS would be inevitable and viewed EFTPOS approval in the light of that expectation.

What does Management 2000 offer?

- **Fully online Web POS**
 - Anywhere in the country
 - Any PC can become a POS and support a full set of devices
 - Integrated EFTPOS from Hypercom and Ingenico
 - Full function POS

Management 2000 is the YES option. YES I can do what I want to do. YES I CAN do what I want to do.

- Full customer history including all transactions by any method
- Full product purchase detail including colour and size
- Marketing and promotional initiatives can be enforced

Management 2000 supports the operation of a freestanding POS in the store. Our most successful customers, however, believe that immediate data and the best possible customer and inventory support is the best solution. The added benefit of this approach is reduced complexity, lower cost store hardware and reduced software costs.
